APIs 686 are issued by the API to standardize terminology in the subse- quent revision. It is essentially a contract between the equipment manufacturer and the client (usually the service provider). Originally called API RP 686, it was published as part of the American Petroleum Institute's (API) National Formulary. Since that time, the document has changed substantially and it is now called the PIP (Pipeline Inspection Procedure). Gutter Installation. The original purpose of the API RP 686 was to allow a service provider to show that he knew what he was doing. In actuality, it is nowÂ . We will be sending an agent to your location to determine the work load and project scope to establish a budget. When we are ready for a pre- installation survey, we will call your for an appointment. There will be a site survey as part of the pre- installation survey. In most cases, the job will be done as a turnkey project. We will remove the existing equipment and install our own and carry out any required repairs to our equipment. We will provide all routine supplies. If needed, we will also provide a temporary service line to connect to the existing line. No fluid separation kit and/or flowmeter is to be used to prevent the possibility of running a few hours before coming back to install the meter and filter. We will prepare the proper plumber's records which will include the work order, inspection sign-off, receipts, work tickets, and field notes. Ordinarily, we don't have a problem with the existing fluid separation and flowmeter. But if you are having trouble, we may want to install one just to establish the true fluid volume and flow. After this is done, the meter can be pulled off the existing line and installed. You will be billed for all work performed beyond the original scope of the pre-installation survey. We will provide a separate charge for repairing or replacing the meter. This charge will be made by us and will be based on the estimated number of labor hours to repair or replace the meter and the actual cost of the repair or replacement.ST. LOUIS, Missouri, U.S.A., September 24, 2015 /EINPresswire.com/ -- The St. Louis marathon is the largest Half-Marathon in the U.S. with 10,200 participants and 12,000 spectators. The 56th running of the St. Louis Half-Marathon is presented by
