Balthazar's Dream is a game made by a single developer. It is a story-driven platformer where you need to follow your best friend's nose to rescue him from a horrible nightmare. Love, courage and determination are needed as you follow your best friend through the beautiful dreamlike landscape, solving puzzles and fighting against the enemy. Since it's an adventure game where you must follow the dog's and his master's scent I spent a lot of time to make everything real and life like. I took inspiration from both our own reality and what I created for the game, making sure that each detail is up to par. Balthazar's Dream: Supports: Memory Card: Supported. Controllers: Supported.
