I need someone who can deliver me the product for the following project. I would like to design an website similar to that of Wordpress. Here is the database information and layout I would like for it. I don't have the time to program one myself. [login to view URL] Why should I hire you? I am looking for a programmer that can do this for me within a couple of days. It doesn't have to be perfect as it will only be needed for the next few months. Further info: - it only needs to be PHP and MySQL - I need to integrate the contact form - it needs to display post-formated content (for example in divs) Want to get an expert in vb to generate a Form that pulls data from the table in the database. I want the form to work like this when you fill it out. - when you fill it out and click submit, the form will generate a message if everything is correct - but if they key in wrong information, the form shows what the problem is and the problem will show up again after the form is filled out. This needs to be a su... Hello All, I have a Wordpress Site, which we are trying to convert to a hybrid mobile app which will be running on both IOS and Android. I already have an app which runs on IOS and Android created by someone else and it is done with backbone js and many many libraries. It is a simple app and uses a standard Wordpress theme. My problem is that I need to retim... I need to make a form with Google App engine that triggers a function in my own App Engine script. I have tried to follow tutorials, but I cannot get it to work. Here is what I have done so far: This is the form in html: Form submit How did the form submit? Form submit
