System Requirements: Free Download.Q: Validate Drop Down Choice I'm creating a form for a WordPress page that has two required form elements. One is a first name field, and the other is a last name field. Here is the HTML code for the form: In order for a record to save, it also requires both first and last names. What's a good way to make sure a value has been selected for each of the two fields? A: You can use jQuery Validation for this. See the W3Schools link for further details on using it. However, if you are after client-side validations as well as server-side then you will want
