AutoCAD

AUTOCAD X is a Python add-on for AutoCAD. It was used by David Arnold, the Autodesk Academy's instructor and designer of the autocad add-on for Leonardo. Kernel programming AutoCAD's scripting abilities were built around the AutoLISP programming language, which was used to create an extensible core of AutoCAD's functionality. This core was used for some time as a foundation upon which to build AutoCAD Add-ons. AutoLISP is still maintained as part of the Autodesk AutoCAD R2009 software platform. Document exchange To exchange information among different AutoCAD versions, you can use the common platform DXF format. This format allows you to transmit drawings in one of the most widespread file formats, share common assets (geometry, dimensions, blocks and coordinates) in a single drawing in a different version, like V-Ray Renderer is used for adding

finishing touches. P-codes P-codes are a way of adding functions to an existing drawing. If you know AutoLISP, or AutoCAD Scripting, you can create your own P-code. Most P-codes are just AutoCAD macros. In order to use P-codes, you can use a scripting language such as AutoLISP or AutoCAD Scripting. It is possible to create some complex P-codes with tools such as AutoCAD ACIS, or AutoCAD Parametric, which allow you to create mathematical functions. Language support AutoCAD supports a number of programming languages, from ASP.NET and MFC to VBA, ActiveX, VB Script and AutoLISP. Some of these support local languages, so that you can write your own code. AutoCAD has limited support for software products such as JCreator, Eclipse, Delphi and Microsoft Visual Studio. It does not support Java.
